MUHAMMAD WALEED

Full Stack Developer | Python & Data-Driven Development
m.waleed7956@gmail.com | 03114131782 | Lahore, Pakistan
https://www.linkedin.com/in/muhammad-waleed040804 | https://github.com/M-Waleed03

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building scalable web applications using React.js, Next.js, Node.js, and MongoDB, with working knowledge of Python. Experienced in REST API development, backend data handling, and integrating dynamic data into production applications. Strong problem-solving and debugging skills, with growing interest in applying technical expertise to data extraction, automation, and analysis.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Byte Systems
May 2025 – Present | Johar Town, Lahore

- Developed and customized responsive websites across multiple CMS platforms using React.js, Next.js, Node.js, ,Python and Firebase, improving performance and cross-device compatibility for 50+ client projects.
- Built reusable React/Next.js components and integrated REST APIs, streamlining content management and reducing development time.

Data Analysis - Internship

Techons
May 2024 – Sep 2024 | DHA Phase 6, Lahore

- Performed data cleaning and analysis on datasets using Excel, identifying trends to support business reporting
- Assisted in building Power BI dashboards to visualize insights, gaining hands-on exposure to data querying and database management

EDUCATION

Bachelors in Computer Science

University of South Asia
2022 – 2026 | Cantt, Lahore | GPA: 3.74

SKILLS

Next JS | React | Python | Rest APIs | Excel | Power BI | Git | Data Analysis

PROJECTS

MediSense, An AI-Based Healthcare System (FYP)

Mar 2026

Built an AI-powered healthcare system to assist in diagnosis, predict conditions and analyse the test reports, applying data analysis and machine learning concepts to real world healthcare data.
Involved data collection, cleaning, and preprocessing to train and evaluate the underlying model
Demonstrates practical application of Python, data analysis, and problem-solving in a real project directly relevant to data science work

Technologies: Next JS, Python, ML/AI, Data Analysis, Data training and testing
