PROFILE

I am Muhammad Waleed, a Computer Science graduate and Full-Stack Web Engineer based in Lahore, Pakistan. I specialize in building modern, responsive websites and web applications. Alongside my professional web development experience, I have a strong interest in Artificial Intelligence, Machine Learning, and Computer Vision. My goal is to combine software engineering with intelligent technologies to develop practical and innovative applications.

EDUCATION

BS Computer Science

EXPERIENCE

Full Stack Web Engineer | The Byte Systems | Johar Town, Lahore, Pakistan

- Develop full-stack websites and web applications.
- Build frontend interfaces and reusable components with React.js and Next.js.
- Develop backend functionality and integrate APIs, databases, and authentication.
- Create responsive interfaces for client and application requirements.
- Maintain websites, debug issues, and optimize functionality and performance.

Freelance Website Designer & Developer | Freelance / Self-employed | Remote

- Design and develop professional websites for clients.
- Create responsive website layouts with custom CSS and JavaScript.
- Customize and refine websites to meet client requirements.
- Build landing pages and business websites.
- Integrate booking systems, forms, popups, and third-party services.
- Deliver client-focused website design and development.
